

# SANDSTILL™

THE ECONOMIC SOLUTION  
TO PROPPANT FLOWBACK

TRICAN'S ENHANCED  
PROPPANT CHEMISTRY

Save  
**50% +**  
on your  
proppant costs  
with Sandstill

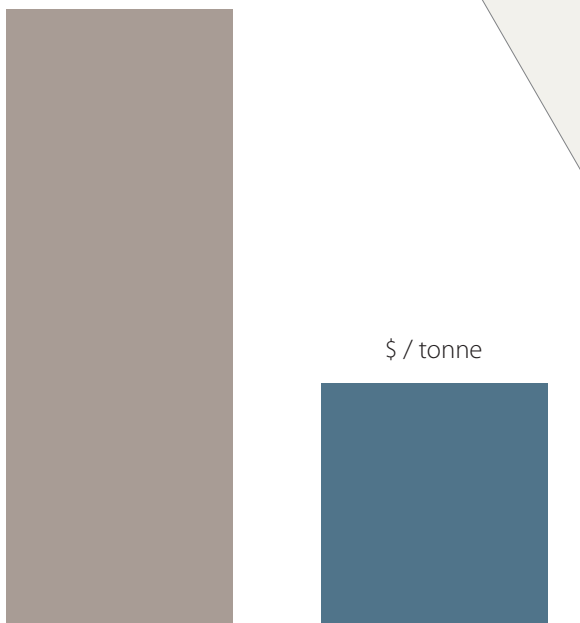

Proppant flowback causes production decline, damages production equipment and causes expensive delays.

## Sandstill:

- Prevents proppant flowback after frac and during production
- Unlike resin, Sandstill does NOT require stress or temperature to bond
- Prevents fines and fine migration
- Is a permanent proppant coating that remains effective over the long term
